UMANG SONI

Full Stack Developer

+91-92149-49992 | soni.umang921@gmail.com | linkedin.com/in/umang-soni123 | github.com/soniumang123 | Jaipur,Rajasthan

Summary

Full Stack Developer (MERN) with hands-on experience building and deploying web applications using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB. Developed full-stack projects including an e-commerce platform with an admin panel, shopping cart, checkout, and Razorpay payment integration, along with a travel listing application featuring authentication and REST APIs. Experienced in backend development, database modeling, API integration, and responsive UI development. Solved 150+ DSA problems on LeetCode and passionate about building scalable, reliable web applications.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, REST API Design, WebSocket
Databases: MongoDB (indexing, aggregation), MySQL
Real-Time / Infra: WebRTC (Mesh, ICE, Signaling), Socket.io
Tools: Git, GitHub, Postman, Render (Deployment)
Core CS: Data Structures & Algorithms, OOP, Problem Solving

Projects

OneCart — Full-Stack E-commerce Web Application **Feb 2026 – Mar 2026**

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Razorpay

- Developed a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB, featuring product browsing, shopping cart, and checkout functionality.
- Built an admin panel to manage e-commerce operations and integrated Razorpay payment gateway for online payment processing.
- Implemented user authentication, Google Sign-In, and cookie-based authentication, and deployed the application on Render.

  Live Demo | Github

Dev Event Platform **Jun 2026 – Jul 2026**

Tech Stack: Next.js 16, TypeScript, MongoDB, Tailwind CSS

- Built a full-stack event management platform using Next.js App Router with dynamic routing, server-side rendering, and responsive UI.
- Integrated MongoDB with REST APIs to manage event listings, attendee registrations, and similar event recommendations through efficient backend data handling.
- Deployed the application on Render and optimized performance using Next.js caching strategies, TypeScript, and modern routing for a scalable production-ready architecture.

  Live Demo | Github

Wanderlust – Travel Listing Web Application **Nov 2025 – Jan 2026**

Tech Stack: Node.js, Express.js, MongoDB, EJS, HTML, CSS

- Cut query latency 40% on 100+ listings via compound MongoDB indexing — no cache, no ORM, pure schema optimization.
- Built 12 REST endpoints with session auth + RBAC; 4 protected routes, zero unauthorized access surface.
- Enforced 3 Mongoose validation schemas — malformed data blocked at ingestion, never reaches the query layer.

  Live Demo | Github

Internship

Web Development Intern – Kvon Tech Consultancy Services **June 2025 – July 2025**

Tech Stack: HTML, CSS, JavaScript, REST APIs, Git, GitHub

- Delivered 3 responsive UI modules with a mobile-first approach — all passed QA across 3 screen breakpoints on first submission, zero revision cycles.
- Cut invalid form submissions by 40% by building client-side validation with real-time inline error feedback, reducing backend noise.
- Integrated REST APIs for dynamic content rendering and verified cross-browser compatibility on Chrome, Firefox, and Safari with no regression.

Education

Arya College of Engineering & IT, Jaipur **2022 – 2026**

B.Tech – Electronics & Communication Engineering | CGPA: 7.8 / 10

Achievements

- Solved 150+ DSA problems on LeetCode — Arrays, Strings, Linked Lists, Stacks, and Queues; consistent Medium-level problem solver.
- Runner-Up, Robo Race Competition — Arya College of Engineering & IT.
